2. BASIS OF PREPARATION

The interim condensed consolidated financial information for the six months ended 30 June 2024 has been prepared in accordance with HKAS 34 Interim Financial Reporting. The interim consolidated financial information does not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group's annual consolidated financial statements for the year ended 31 December 2023. The Interim Financial Information is presented in Renminbi (“RMB”), and all values are rounded to the nearest thousand (RMB'000) except when otherwise indicated.

3. CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

The Group has adopted the following new and revised IFRSs for the first time for the current year's financial statements.

Amendments to IFRS 16	<i>Lease Liability in a Sale and Leaseback</i>
Amendments to IAS 1	<i>Classification of Liabilities as Current or Non-current</i> <i>(the “2020 Amendments”)</i>
Amendments to IAS 1	<i>Non-current Liabilities with Covenants</i> <i>(the “2022 Amendments”)</i>
Amendments to IAS 7 and IFRS 7	<i>Supplier Finance Arrangements</i>

The nature and the impact of the new and revised IFRSs that are applicable to the Group are described below:

- (a) Amendments to IFRS 16 specify the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction to ensure the seller-lessee does not recognise any amount of the gain or loss that relates to the right of use it retains. Since the Group has no sale and leaseback transactions with variable lease payments that do not depend on an index or a rate occurring from the date of initial application of IFRS 16, the amendments did not have any impact on the financial position or performance of the Group.
- (b) The 2020 Amendments clarify the requirements for classifying liabilities as current or non-current, including what is meant by a right to defer settlement and that a right to defer must exist at the end of the reporting period. Classification of a liability is unaffected by the likelihood that the entity will exercise its right to defer settlement. The amendments also clarify that a liability can be settled in its own equity instruments, and that only if a conversion option in a convertible liability is itself accounted for as an equity instrument would the terms of a liability not impact its classification. The 2022 Amendments further clarify that, among covenants of a liability arising from a loan arrangement, only those with which an entity must comply on or before the reporting date affect the classification of that liability as current or non-current. Additional disclosures are required for non-current liabilities that are subject to the entity complying with future covenants within 12 months after the reporting period. The Group has reassessed the terms and conditions of its liabilities as at 1 January 2023 and 2024 and concluded that the classification of its liabilities as current or non-current remained unchanged upon initial application of the amendments. Accordingly, the amendments did not have any impact on the financial position or performance of the Group.
- (c) Amendments to IAS 7 and IFRS 7 clarify the characteristics of supplier finance arrangements and require additional disclosure of such arrangements. The disclosure requirements in the amendments are intended to assist users of financial statements in understanding the effects of supplier finance arrangements on an entity's liabilities, cash flows and exposure to liquidity risk. The disclosure of relevant information for supplier finance arrangements is not required for any interim reporting period during the first annual reporting period in which an entity applies the amendments. As the Group does not have supplier finance arrangements, the amendments did not have any impact on the interim condensed consolidated financial information.

MANAGEMENT DISCUSSION AND ANALYSIS

I. Results for the Six Months Ended 30 June 2024

Gold Production

For the Reporting Period, the Group's total gold production volume was approximately 453.7 kg (or approximately 14,587.0 ounces), representing a decrease of approximately 4% as compared to the corresponding period of 2023. The decrease in total gold output was mainly due to temporary pause of mining activities of the underground mine during February 2024 as the supply of explosive was restricted by the government authority as well as underground mine staff were on annual leave in celebration of the Chinese New Year during February 2024.

Revenue

For the Reporting Period, the Group's revenue was approximately RMB236,173,000 (corresponding period of 2023: RMB196,659,000), representing an increase of approximately 20.1% as compared to the corresponding period of 2023. The increase was mainly attributable to the increase in average selling price by 21.1% partially offset by the decrease in sales volume by 0.8%.

Net Profit

For the Reporting Period, the Group's net profit was approximately RMB78,867,000 (corresponding period of 2023: RMB52,769,000), representing an increase of approximately 49.5% as compared to the corresponding period of 2023. The increase in net profit was primarily due to the increase in gross profit as a result of the higher average selling price, as well as an increase in interest income earned on the Group's cash and cash equivalent balances and was partially offset by an increase in post-listing administrative expenses.

Earnings Per Share

For the Reporting Period, the basic and diluted earnings per share attributable to ordinary equity holders of the parent amounted to approximately RMB0.03, (restated basic and diluted earnings per share for the corresponding period of 2023: RMB0.02), representing an increase of 50% as compared to the corresponding period of 2023.

II. Market Overview

During the Reporting Period, the complex and volatile domestic and external environment has become more complicated and severe, bringing many uncertain impacts to the global economy. The increase in gold demand in the first half of 2024 as compared with 2023 was mainly attributed to the economic and geopolitical uncertainties as well as the interest rate drivers.

In the first half of 2024, the global gold spot price continued to rise, reaching the highest price at US\$2,444.35 per ounce in the second quarter and the average global gold spot price was US\$2,205.06 per ounce in the first half of 2024. The rise in gold spot price was primarily driven by the escalating geopolitical risks and the interest rate outlook to the US budget deficit concerns, inflation hedging and central bank buying. As a traditional safe-haven asset, the gold spot price has further increased in China since the China Central Bank has been continuing its gold purchasing power due to the local asset uncertainty and risks associated with the economic outlook. China's gold spot price continued to rise in the first half of 2024, reaching the highest price at RMB574.11 per gram in the second quarter and the average gold spot price in the PRC was RMB520.63 per gram in the first half of 2024.

III. Business Review

In the Reporting Period, the gold production volume of the Group was approximately 453.7 kg (equivalent to approximately 14,587.0 ounces), representing a decrease of approximately 18.8 kg (equivalent to approximately 604.2 ounces) or 4.0% as compared with the corresponding period of 2023. The decrease in total gold output was mainly due to temporary pause of mining activities of the underground mine during February 2024 as the supply of explosive was restricted by the government authority as well as underground mine staff were on annual leave in celebration of the Chinese New Year during February 2024. Nevertheless, the Group's revenue increased by approximately 20.1% to approximately RMB236,173,000 (corresponding period of 2023: RMB196,659,000) as compared with the corresponding period of 2023. The net profit of the Group was approximately RMB78,867,000 (corresponding period of 2023: RMB52,769,000). The basic and diluted earnings per share amounted to approximately RMB0.03 (corresponding period of 2023: RMB0.02 (restated)).

IV. Financial Analysis

Revenue

For the Reporting Period, the Group's revenue was approximately RMB236,173,000 (corresponding period of 2023: RMB196,659,000), representing an increase of approximately 20.1% as compared to the corresponding period of 2023. The increase was mainly attributable to the increase in average selling price by 21.1% partially offset by the decrease in sales volume by 0.8%.

Cost of Sales

For the Reporting Period, the Group's cost of sales was approximately RMB110,693,000 (corresponding period of 2023: RMB104,277,000), representing an increase of approximately 6.2% as compared to the corresponding period of 2023.

Gross Profit and Gross Profit Margin

Generally, the Group introduces conservative strategies on its risk management. The Group has not used any derivatives and other instruments for hedging purposes. The Group does not hold or issue derivative financial instruments for trading purposes.

Gold Prices and Other Commodities Prices Risks

The Group's revenue and profit were affected by fluctuations in the gold prices and other commodity prices as all of our products were sold at market prices and such fluctuations in prices were beyond our control. Our revenue is generated from the sale of gold bullion refined by third party smelters derived from gold concentrate processed by us, with reference to the prevailing Au (T+D) spot price as quoted on the Shanghai Gold Exchange. Historically, while the gold price has increased in value over time, it has fluctuated widely and there can be no assurance that the gold price will not continue to fluctuate in the future or that such prices will otherwise remain at sufficiently high levels to support our profitability and cash flow.

Interest Rate Risk

The Group's exposure to risk for changes in market interest rates relates primarily to the Group's interest-bearing bank borrowings. The Group had not used any derivative financial instruments to hedge interest rate risk during the Reporting Period, and obtains all bank borrowings with a fixed rate.

Credit Risk

The Group trades only with recognised and creditworthy customers with no requirement for collateral. The balances of trade receivables were nil as at 30 June 2024 and as at 31 December 2023. In this regard, the directors of the Company consider that the Group's credit risk is significantly reduced.

Foreign Exchange Risk

The Group's transactions are mainly denominated in Renminbi. As such, the fluctuations in exchange rates may affect international and domestic gold prices, which may therefore affect the Group's operating results. The Group has currency exposures mainly arising from cash at banks denominated in USD and CAD. At present, the Group does not intend to seek to hedge its exposure to foreign exchange fluctuations. The Group constantly monitors the economic situation and the Group's foreign exchange risk profile and will consider appropriate hedging measures in the future should the need arise.

Risk of Change in Industry Policies

An array of laws, regulations and rules on the gold mining and refining industry in China constitutes the external regulatory and legal environment for the Company's ordinary and continuous operation and have great influence on the Company's business development, production and operation (including licences and permits), etc. Changes in relevant industry policies may have corresponding effects on the Company's production and operation.

China's gold market represents approximately one fifth of global sales. Amid a landscape of growing geopolitical tensions and global uncertainties, such as the general elections in the US, the role of gold as a stable investment continues to reinforced. Central Banks in market such as China, India and Turkey are proactively boosting their gold reserves. Therefore, the China's gold spot price is expected to continue boosting gold prices rise in the foreseeable future.
